1. Accounting figures are rounded down to the nearest unit unless otherwise stated; KPI figures indicate "R&D Outsourcing" and "Construction Management Outsourcing" segments in Japan
2. "Net profit" refers to net profit attributable to owners of the parent company after deducting non-controlling interests
3. "Core operating profit" is calculated by subtracting SG&A expenses from gross profit, excluding extraordinary items (ex. government subsidy, impairment loss) recognized in other income or other expenses
4. "Operating profit before PPA asset amortization" is calculated by adding back following items to operating profit: 1) amortization of client related asset incurred by Purchase Price Allocation at M&A transactions, 2) impairment loss, 3) changes in fair value amount and early exercise of put option liabilities, and 4) changes in fair value amount of earn-out liabilities
5. Per share amounts are calculated based on the number of shares after a three-for-one split of shares effective July 1, 2021

Q3 FY25.6 Financial Overviews

- Year-to-date Q3 FY25.6 revenue was **177.7 billion yen**, up 9.3% year-on-year; gross profit was **48.1 billion yen**, up 11.3% year-on-year; core operating profit was **21.7 billion yen**, up 19.9% year-on-year; operating profit was **22.0 billion yen**, up 20.2% year-on-year; SG&A expenses increased by 1.28 billion yen, of which recruitment cost increased by 750 million yen; SG&A ratio was remained below 15.0%
- Year-to-date Q3 FY25.6 gross profit increased by **4.9 billion yen** year-on-year, mainly due to 1) increased allocation of domestic dispatch engineers (up 1.38 billion yen), 2) price hike of dispatch contracts (up 4.08 billion yen), 3) expansion of project-type services (up 1.59 billion yen), offset by increases in 4) provision for seasonal and financial results-linked bonuses (down 2.2 billion yen in total), and 5) provision for paid leave (down 360 million yen)
- In the major domestic businesses, the increase in the base charge at contract renewal in March 2025 surpassed both the previous year's level and this year's budget

FY25.6 Guidance – Updated Key KPIs for FY25.6

- In FY25.6 (the fourth year of the medium-term plan), expect revenue to **increase by 9.0 billion yen** from the plan and operating profit of **27 billion yen**, the same level as the plan, despite assuming M&A contributions behind the plan
- Core operating profit margin will steadily grow although there has been a delay in the reduction of SG&A ratio due to soaring recruitment fees associated with changes in the business environment, etc.
- Anticipate unit sales price to improve more than previous years by **promoting sufficient price pass-on** to accommodate annual pay hike, even though the growth in the number of engineers is expected to decline due to worsening turnover ratio

- **R&D Outsourcing:** Ensure earnings growth exceeding 10% despite facing challenges such as deterioration in turnover and intensifying competition for talent
- **Construction Management Outsourcing:** Anticipate profit margin to decline slightly, due to decreases in holiday work and overtime hours, and full-scale inexperienced hires
- **Other Businesses in Japan:** Continue to invest in expanding the external sale of training for engineers to competitors and customers, expecting sufficient returns over the remaining two years of the medium-term plan
- **Overseas:** Aim to securely meet the earnings budget by carrying out proactive initiatives, rather than relying on an optimistic outlook, amid the uncertainty of the global economy

Shareholder Return

- Reaffirm basic policy to make dividend payment steadily twice a year in the form of interim and year-end ones pursuant to **annual dividend payout ratio of 50% or higher**; with considering **a progressive annual dividend**, distributed the annual dividend of **80 yen** per share (payout ratio **58.2%**) for FY24.6, and provide the forecast of **90 yen** per share (payout ratio **50.9%**) as the annual dividend for FY25.6
- Fully completed the 5.0 billion yen share buyback program** launched in Q1 FY25.6 (total shareholder return ratio of **77.7%**) by November 2024 to further improve capital efficiency with comprehensive consideration of cash reserves and stock price level; repurchased shares were all retired

Reference: Capital Policy

- Our four capital policies described below set **value creation (ROIC > cost of capital)** as a primary focus of business operation with maintaining solid financial foundation, as well as placing high importance on TSR
- Free cash flows retained after distributing 50% cash dividend to shareholders will be spent for growth investment such as M&As; in case of being unable to find justifiable investment opportunities which may generate sufficient return exceeding the cost of capital, flexibly considers carrying out share repurchase as a way of shareholder return in light of **capital efficiency**

Medium-Term Capital Policy

Appendix: Reportable Segments [as of Q3 FY25.6 End]

R&D Outsourcing

Provides engineer staffing and contract services related to mechanical design, electrical/electronic design, embedded software development, IT network construction, business application development, IT maintenance and operations, bio research, etc.

Other Businesses in Japan

Provides professional recruitment, technical education and training services

Overseas

Provides technological outsourcing and professional recruitment services in China; IT engineer staffing service and contract services in Southeast Asia and India (including offshore delivery to US/EMEA/JP customers); engineer staffing and professional recruitment services in the UK

Construction Management Outsourcing

Provides engineer staffing and contract drafting of working drawings related to construction management (safety/quality/process/cost management) for construction, civil engineering, electrical equipment, plant engineering, etc.

Headquarters

Provides shared services to group companies, hires and supports disabled people

Appendix: Risk Assets [as of Q3 FY25.6 End]

- Major component of goodwill in **R&D/Construction Management Outsourcing (29.2 billion yen)** was derived from MBO transaction carried out by management and private equity fund; its fair value amount well exceeds carrying amount of each CGU even in the COVID-19 environment, consequently **impairment risks are extremely low**
- Goodwill in **R&D Outsourcing (4.0 billion yen)**, which was newly recognized through M&As, is also included into the CGU at the time of MBO, consequently **impairment risks are extremely low**
- Other Businesses in Japan:** Based on the strategic review, considering a carve-out of Boyd & Moore Executive Search, which recorded goodwill impairment in FY24.6
- Overseas:** Continue discussions with a 49% shareholder of Helius regarding its future management policies; seeking the possibility of selling Orion to a third party; to overcome struggles to acquire new projects, Robosoft strengthens collaboration with Japan and enhances sales activities by leveraging domestic customer base

Distribution of Engineers in Japan

- According to the national census in 2020, the number of engineers in Japan is 2.69 million (of which, about 47% of them are IT engineers), and increased by 260 thousand in five years
- In terms of IT engineers, the outsourcing ratio is relatively high in Japan

Trend of R&D Spending and ICT Investment

- R&D is a field less susceptible to impact of the economy; as a nation, Japan reported 22 trillion yen, a record-high for R&D spending in 2023, and its growth is expected to continue in the future
- Japan's ICT investment is gradually shifting from "hardware" to "software"

Outsourcing Usage Ratio of R&D and IT Activity

- Outsourcing usage ratio of R&D and IT activity is gradually increasing overall
- Even Information & Telecommunication companies are using more outside resources in their own IT activity

Engineer Staffing Market Overview

- Estimated whole engineer staffing market size in Japan was about 2.8 trillion yen in 2023; up 5.2% year-on-year, of which software development market size was about 1.5 trillion yen; up 7.6% year-on-year
- Yano Research Institute forecasts that the engineer staffing market in Japan is expected to grow at a CAGR of 4.8% from FY2023 to FY2027 (forecast)

Engineering Professional Services' Resilience to External Shocks

- First wave of COVID-19 spread impacted a lot less on new job offers for engineers compared to the Global Financial Crisis
- The fact above indicates the possibility that the importance of talents with technological expertise or the priority of R&D and IT system development to maintain competitiveness has been increased in the past 10 years, corroborating the robustness of our business

Background of Engineer Staffing Market Growth and Our Strengths – 1. Growing Demand

- Demand-supply gap in IT sector is huge; especially leading-edge IT engineers (AI, big data, IoT, etc.) will be in higher demand
- Weakening demand for engineers due to the spread of AI will be more than offset by the new demand for engineers

10. Projected Shortage in Advanced and Conventional IT engineers

Background of Engineer Staffing Market Growth and Our Strengths – 2. Mid Careers Market

- The turnover ratio in Japan remains around 10% which shows career-change market has a certain scale; more than 200,000 engineers per year
- Turnover ratio of IT engineers tends to be relatively higher than other type of engineers

Background of Engineer Staffing Market Growth and Our Strengths – 2. Mid Careers Market (Cont.)

- The lifetime employment and seniority-based wage system have firmly remained in Japan
- The number of mid-career recruitment by blue-chip companies is limited due to the gap between productivity and salary

Background of Engineer Staffing Market Growth and Our Strengths – 3. New Grads Market

- Even though the number of university graduates is slightly increasing because of higher university entrance rate, the number of science and engineering graduates begins to decrease from 2000
- New grads tend to prefer blue-chip companies while such companies have limited number of job openings for them

Wage Hike & Human Capital Investment in Japan

- Average annual wage hike in the private sector in Japan was 4.1% in 2024, representing a continuous increase from 3.2% in the previous year, driven by the recent wage hike momentum
- Japan's investment in human capital, both public and private, is significantly lower than other developed countries
