## **Announcement Concerning New Tokyo Technical Training Center to be Opened by TechnoPro Construction, Inc., Consolidated Subsidiary of TechnoPro Holdings**

With signs of increasing government and private investment, as well as the upcoming 2020 Tokyo Olympics and Paralympics, the construction market of Japan is expected to continue to follow a path of strong growth. At the same time, however, the number of workers employed by the construction industry has steadily declined. Over the past 10 years, the industry has lost 700,000 workers, and the domestic construction market is projected to experience a shortage of skilled workers in the future. In response to these market developments, TechnoPro Holdings, Inc. consolidated subsidiary TechnoPro Construction, Inc. will open a new Tokyo Technical Training Center training facility in Hachioji City, Tokyo. The Tokyo Technical Training Center will foster many construction management engineers who have acquired knowledge and skills in safety management, quality assurance, process management, and cost management.

### 1. Tokyo Technical Training Center Overview

Name: Tokyo Technical Training Center

Scheduled Open: July 18, 2017

Location: Hachioji First Square 6F, 3-20-6 Myojincho, Hachioji City, Tokyo

Floor Space: 72.1m<sup>2</sup>

Trainee Capacity: 12 (per class)

Training Period: Sixteen days/120.5 hours (including one day of company orientation)

### 2. Tokyo Technical Training Center Features

#### 1) Training curriculum matched to trending developments

Construction industry needs change quickly with the times. Participants in the Tokyo Technical Training Center training will attend highly specialized seminars providing information about the latest government trends and technical data, along with practical training. This knowledge and these skills will be invaluable in actual use at construction projects.

## 2) Improved proficiency through small groups

The objective of this training is to teach knowledge and skills for use in actual construction projects. To this end, training will be offered to small groups of at most 12 individuals, which will result in higher proficiency levels.

## 3) Full-time instructors who are experts in the construction industry

Course instructors will consist of full-time faculty who are experts in construction information, including actual construction project conditions, the latest changes in the construction industry, and government and regulatory trends, etc.

## 3. TechnoPro Construction, Inc. Overview

TechnoPro Construction is part of the TechnoPro Group, the largest engineering human resources service provider in Japan. TechnoPro Construction is engaged in the worker dispatch business specializing in construction management outsourcing. As of May 2017, TechnoPro Construction has 1,815 engineers serving more than 300 customers in Japan, including leading domestic general contractors.
